Executive Summary

National Grid ESO in its role as EMR Delivery Body is required by the Capacity Market Rules 2014 (Rule 5.10.2) to notify the Secretary of State of the Final Results of the Capacity Market Auction as soon as reasonably practicable following the conclusion of the Capacity Auction. This report discharges that obligation.

The T-1 Capacity Auction for delivery in 2020/21 concluded on **7**th **February 2020**, **13:00 BST**. The results of the auction are as follows, where any capacity figure refers to de-rated capacity, unless otherwise stated.

The CMUs to which a Capacity Agreement has been awarded and the duration of those Capacity Agreements are listed in the CMU results section (page 5).

In addition to the results presented above, National Grid ESO is required under Capacity Market Rule 5.10.3 to report any CMUs that were removed from the IT Auction System under Capacity Market Rule 5.3.3. The Auction concluded without any CMUs being removed from the system by National Grid.

The remainder of this report gives further detail on the Capacity Market Auction Clearing, how the Clearing Price was reached and what makes up the capacity that has been procured.

The results of the auction are provisional for the period of 8 working days after the completion of the Capacity Market Auction, during which time the Secretary of State may annul the auction on the grounds specified in Regulation 27 of the Electricity Capacity Regulations 2014. Following the close of the 19th of February 2020, the Auction Results are final.

Any T-1 (delivery year 2020/21) data shown within this document originates from the latest Capacity Market Register available at the time this document was published.

nationalgridESO | Electricity Market Reform Delivery Body

The high level auction results are summarised below including a round by round summary graph. As shown within the round summary, the auction cleared in round 15.

Auction Results

Auction and Delivery Year	T-1 Auction, Delivery Year 2020/21
Date and time auction cleared	13:00, 07th February 2020
Clearing Price	£1.00
Aggregate Capacity of CMUs awarded Capacity Agreements	1024.409 MW
Target Capacity (demand at clearing price)	300 MW
Capacity entering auction and proportion awarded an agreement	3027.229 MW (33.84% awarded an agreement)
Number of CMUs awarded an agreement	33
Number of applicant companies awarded an agreement	86
Number of parent companies awarded an agreement	63

The awarded and exited capacity are summarised below by technology type. Existing CMUs made up 68.48% of the capacity entering the auction and formed both the largest capacity to exit the auction (58.40%) and the largest capacity to be awarded an agreement (41.60%). Of the total 320.276MW of new build generation (10.58% of capacity entering the auction), 23.58% of this capacity was successful in gaining an agreement.

The Auction did not clear with an exact match of Offered Capacity and target capacity ("Clearing Capacity") and so the Net Welfare Algorithm was used to determine price and volume.

The Net Welfare Algorithm evaluates the integral specified in Rule 5.9.6 to determine whether to include the marginal unit.

The algorithm subtracts the additional cost of procuring the marginal unit from the welfare gained by procuring the marginal unit. If the result is positive i.e. the welfare gained by procuring the additional unit outweighs the cost, the unit is included, and the Clearing Price is set to the Exit Bid Price of that unit.

The result of the Net Welfare Algorithm was positive and the marginal unit was procured hence the aggregate Capacity of CMU's awarded Capacity agreements exceeds the Target Capacity.

A fuller explanation of the Net Welfare Algorithm can be found on page 8 of the Capacity Market Auction User Guide.

The below charts show the breakdown by the generating type of CMUs that were awarded an agreement and those CMUs who exited the auction above the clearing price.

Please note in the above charts, "Refurbishing Generating CMU" includes bidders who may have aquired either a pre-refurbishing agreement or a post-refurbishing agreement.

The below charts show the breakdown by the primary fuel type of CMUs that were awarded an agreement and those CMUs who exited the auction above the clearing price.
