Executive Summary

National Grid in its role as EMR Delivery Body is required by the Capacity Market Rules 2014 (Rule 5.10.2) to notify the Secretary of State of the Provisional Results of the Capacity Market Auction as soon as reasonably practicable following the conclusion of the Capacity Auction. This report discharges that obligation.

The T-4 Capacity Auction for delivery in 2020/21 concluded on 8th December 2016, 14:30 GMT. The results of the auction are as follows, where all prices are in 2015/16 prices and any capacity figure refers to de-rated capacity, unless otherwise stated.

The Clearing Price is: **£22.50 kW / year** (2015/16 Prices).

The Aggregate Capacity of Capacity Market Units awarded Capacity Agreements is: **52,425.302 MW**.

The CMUs to which a Capacity Agreement has been provisionally awarded and the duration of those Capacity Agreements are listed in Appendix A.

In addition to the results presented above, National Grid is required under Capacity Market Rule 5.10.3 to report any CMUs that were removed from the Auction System under Capacity Market Rule 5.3.3. The Auction concluded without any CMUs being removed from the system by National Grid.

The remainder of this report gives further detail on the Capacity Market Auction Clearing, how the Clearing Price was reached and what makes up the capacity that has been procured.

The results of the auction remain provisional for the period of 8 working days after the completion of the Capacity Market Auction, during which time the Secretary of State may annul the auction on the grounds specified in Regulation 27 of the Electricity Capacity Regulations 2014. Final results will be published once this period has elapsed.

The Auction Clearing Price

The Clearing Price is: **£22.50 kW / year** (2015/16 Prices).

The 2016 T-4 Auction Cleared in Bidding Round 11 on the 8th December 2016, 14:30 GMT.

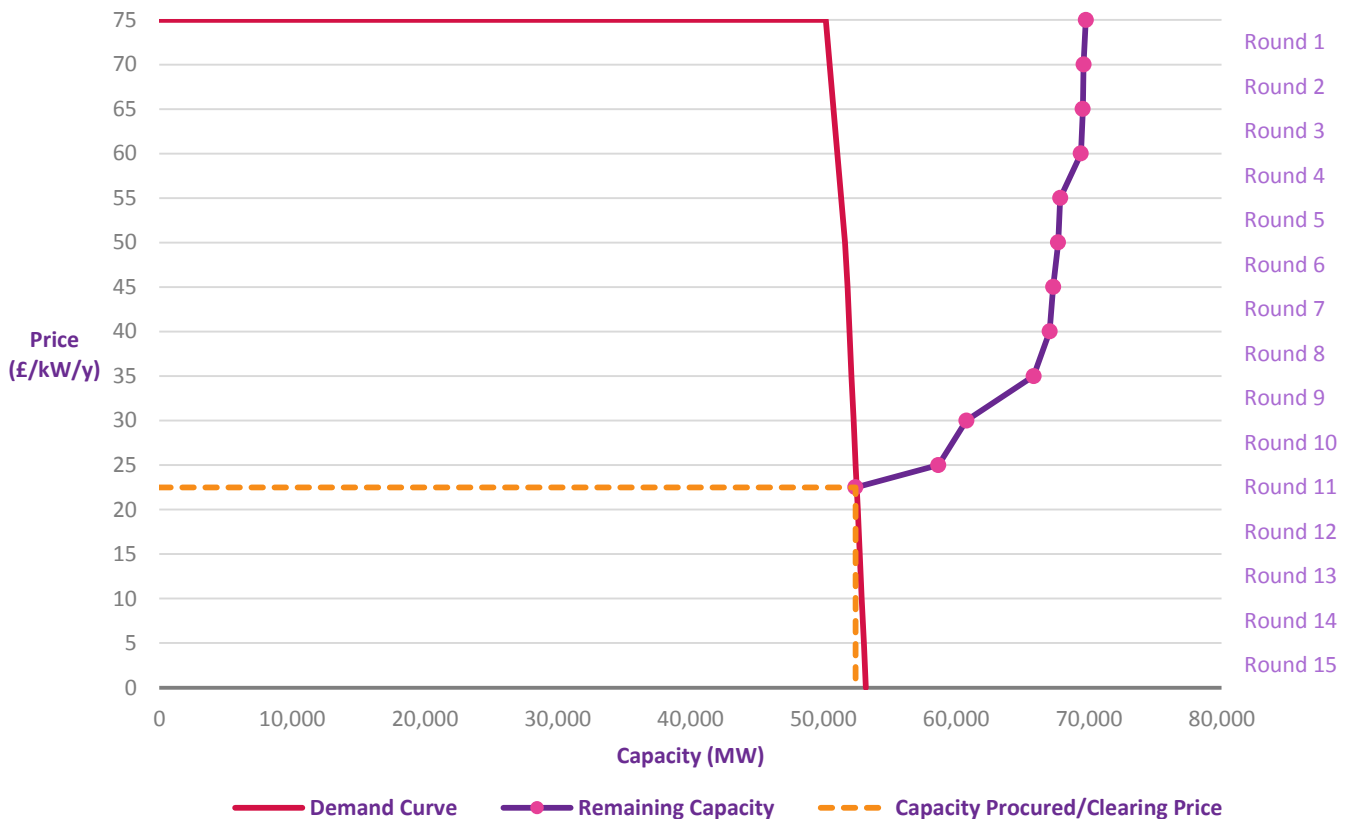

The Auction did not clear with an exact match of Offered Capacity and target capacity (“Clearing Capacity”) and so the Net Welfare Algorithm was used to determine price and volume.

The Net Welfare Algorithm evaluates the integral specified in Rule 5.9.6 to determine whether to include the marginal unit. The algorithm subtracts the additional cost of procuring the marginal unit from the welfare gained by procuring the marginal unit. If the result is positive i.e. the welfare gained by procuring the additional unit outweighs the cost, the unit is included, and the Clearing Price is set to the Exit Bid Price of that unit.

The result of the Net Welfare Algorithm was negative and the marginal unit has not been procured.

Figure 1 shows the Demand Curve and the supply curve. The supply curve is found by cumulatively adding the Bidding Capacities of CMUs, according to their Exit Ranking.

The Aggregate Bidding Capacity of CMUs Provisionally Awarded Agreements

The Aggregate Bidding Capacity of CMUs provisionally awarded Capacity Agreements is: **52,425.302 MW**. A total of **69,777.050 MW** entered the Auction, of which **75.13%** received Capacity Agreements for delivery in 2020/21.

Figure 2: Breakdown of the Capacity Entering the Auction Provisionally Awarded Agreements

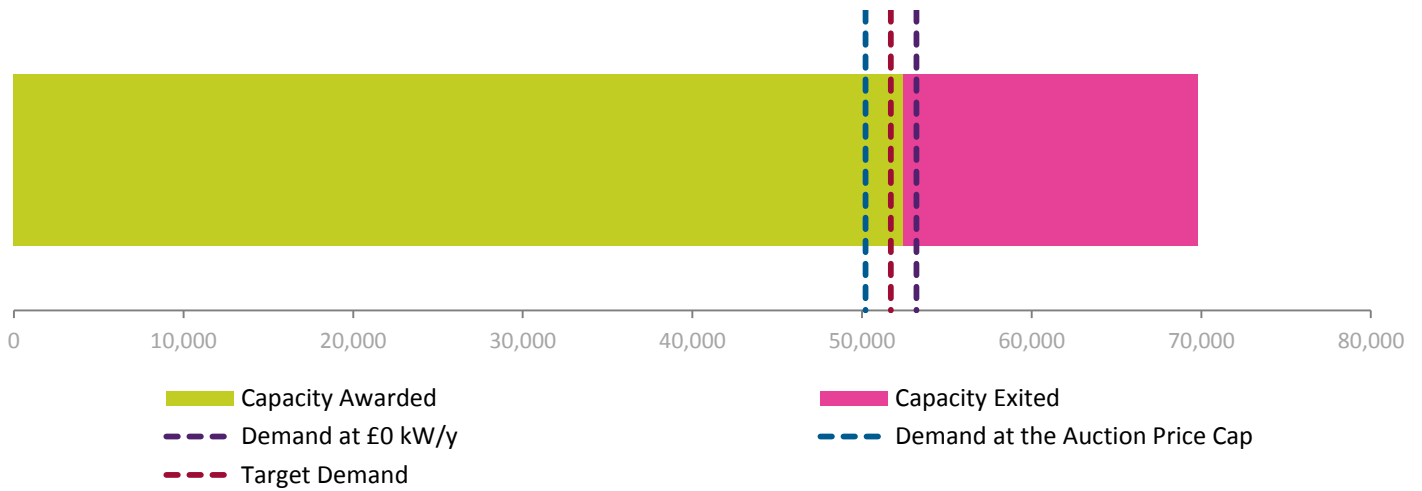

Figure 3 and Table 1 show the breakdown of the Total Awarded Capacity Agreements by CMU Type. A mixture of new and existing Capacity was procured. **4,779.405 MW** of the volume of Capacity Agreements awarded is for new or refurbishing capacity. This is the sum of the capacity of CMUs that have been awarded agreements that are Refurbishing, Unproven DSR or New Build CMUs. This excludes CMUs which have only been awarded a Capacity Agreement for their Pre-Refurbishment component.

The CMUs to which Capacity Agreements have been Provisionally Awarded

A List of the CMUs and their provisional status has been included in Appendix A. In total there are 483 CMUs that have been awarded Capacity Agreements, from 166 Applicant Companies.

The Duration of Agreements Awarded

The duration of the Capacity Agreement received for each CMU is listed in Appendix A. 74.12% of CMUs that received Capacity Agreements were for a duration of 1 year, 0.21% for 12 years and 25.67% 15 years.
